Weather Routing

Leading the way in weather

Our new weather routing module, powered by WNI, the world's leading private weather service company, combines high-quality data and best-in-class ship routing visualisation and optimisation with NavStation's unique planning capabilities.

The result is a simple, seamless and fully comprehensive solution, delivering compelling user benefits.

Find your optimal route ahead with NAVTOR and WNI.

St Weather Routeing

Easily view and select from recommended routes

WITH WEATHER ROUTEING MODULE YOU CAN:

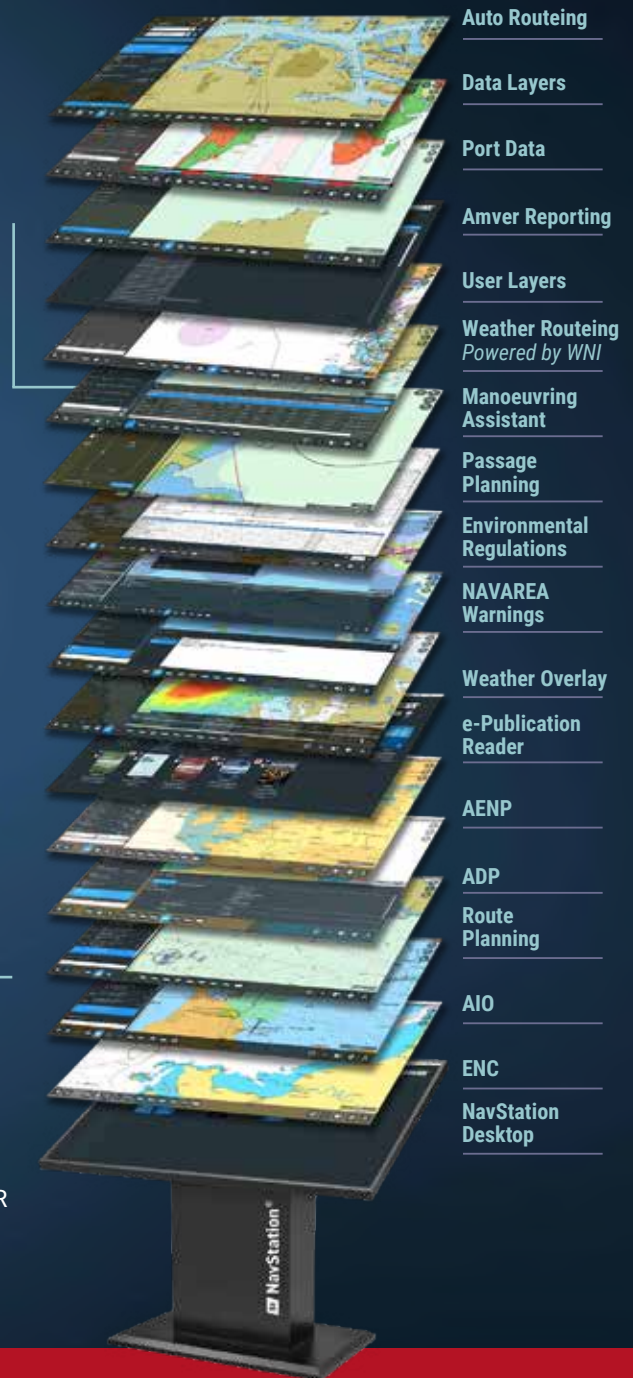

- Enhance safety
- Save fuel
- Reduce emissions
- Reduce cost - no need for two SW systems
- Reduce human errors by integrating Weather, Weather Routeing and full Passage Planning capabilities
- Enhance user-operability through streamlined functions

Easily view and select from recommended routes provided by WNI Risk Operators, based on different criteria, such as fuel, ETA, bad weather avoidance and more.

SAVE TIME AND COSTS

NavStation includes access to an array of digital navigational information incorporated additionally as overlays on top of official ENC charts. With databases and permits automatically distributed and updated seamlessly through our cyber-secure NavBox, NAVTOR continually ensures vessels have the data they need to keep them safe, compliant and always up to date.

ONE COST-EFFECTIVE SYSTEM FOR ALL PLANNING AND SHIP ROUTEING
